

# THIS IS PHISHING! DON'T GET CAUGHT!

## Phishing Clue #1: Phony Sender Email Address

Always make sure that the address matches the sender's name and has an official @company.com email address.

## Phishing Clue #2: Grammar, Spelling & Writing Errors

Phishing emails will usually contain grammar, spelling or mechanical errors in the message. **Note:** Fake Microsoft Logo and poor spelling.

## Phishing Clue #3: Suspicious Links

Phishing emails often contain suspicious links they want you to click. **DO NOT CLICK!** Hover mouse over link to determine if it is a fake URL.

**From:** Message Center <ProtectedReviewActivityCenter-MessageService@xyz.nz>  
**To:** Staff Administrator <staff.administrator@temple.edu>  
**Date:** September 21, 2018 at 11:11 AM EDT  
**Subject:** Action Required: staff.administrator@temple.edu Review Activit
